

PocketSmart – Conclusion

Member Assignment – Vakitha Begam N (Team Lead)

1. Topic

Conclusion of the PocketSmart project

Epic: Project Conclusion

2. Project Overview

PocketSmart is an AI-powered app that helps users track spending, set budgets, and get personalized money-saving suggestions based on their spending habits. It uses Google Gemini AI to analyze spending data and generate useful insights.

3. Objective

To summarize the work completed in PocketSmart, confirm that all features work together as one system, and note the results and future improvements.

4. Work Steps

- 1 Review all completed epics, including Gemini AI initialization and core functionalities.
- 2 Confirm that the Gemini API connection and secure API key handling work correctly.
- 3 Check that the code is modular and each feature works on its own.
- 4 Test the complete flow from user input to AI insights on the dashboard.
- 5 Fix any remaining errors and confirm that error handling works clearly.
- 6 Prepare the final documentation and make sure no API key is uploaded to GitHub.
- 7 Summarize the results and the benefits PocketSmart gives to users.
- 8 List future improvements and hand over the final project to the team.

5. Main Parts of the Conclusion

- Summary of completed work
- Gemini AI integration results
- Testing and error handling status
- Benefits for users
- Future improvements
- Final documentation and project handover
